TAKING NSU TO THE NEXT LEVEL

A Moving Landscape of Comparative Genomics in Mammals

Presented by
Stephen J. O'Brien, Ph.D.

American Geneticist
Advisory Editor of the Scientific Journal of Heredity

He is known for his contributions on the evolution of mammalian viruses and the adaptation to this exposure by the host, but also works on mammalian systematics. He worked for 20 years as chief in the Laboratory of Genomic Diversity, National Cancer Institute, USA.

Wednesday, March 21, 2012
At the NSU Ocean Center, Classroom 1
4:00 - 5:00 p.m.

No continuing medical education credit will be offered for this program.

NSU COM/OC Grand Rounds is a lecture series directed toward featuring current medically relevant topics and showcasing the best of NSU and colleagues from around the world.

Please call if ADA (American with Disabilities Act) accommodations are needed.
