AcademicFest

at the Oceanographic Center

Nova Southeastern University's Oceanographic Center (OC) is one of NSU's "gems." Join your colleagues for a walk-through of this historical campus, learning how oceanographic research has evolved through the decades.

The walk-through will culminate with a tour of NSU's newest Center of Excellence for Coral Reef Ecosystems Research—an 86,000-square-foot research facility filled with the latest in scientific technology. Meet OC researchers, staff, and students, and then unwind from a productive work week with an old OC tradition: A cookout on the oceanfront.

Friday, December 7
4:00–7:00 p.m.
